HW due 1/24 1/19/16, 11:52 AM

### HW due 1/24

Due: 11:59pm on Sunday, January 24, 2016

You will receive no credit for items you complete after the assignment is due. Grading Policy

# Exercise 2.7

A car is stopped at a traffic light. It then travels along a straight road so that its distance from the light is given by  $x(t)=bt^2-ct^3$ , where b = 2.30 m/s $^2$  and c = 0.130 m/s $^3$ .

#### Part A

Calculate the average velocity of the car for the time interval t= 0 to t= 10.0 s.

ANSWER:

$$v_{\rm av}$$
 = 10.0 m/s

Correct

### Part B

Calculate the instantaneous velocity of the car at t=0.

ANSWER:

$$v = 0 \text{ m/s}$$

**Correct** 

### Part C

Calculate the instantaneous velocity of the car at  $t=5.00 \mathrm{\ s.}$ 

ANSWER:

$$v = 13.3 \text{ m/s}$$

Correct

## Part D

Calculate the instantaneous velocity of the car at t=10.0 s.

HW due 1/24 1/19/16, 11:52 AM

ANSWER:

$$v = 7.00 \text{ m/s}$$

**Correct** 

### Part E

How long after starting from rest is the car again at rest?

ANSWER:

$$t = 11.8 \text{ s}$$

**Correct** 

# Exercise 2.21

The fastest measured pitched baseball left the pitcher's hand at a speed of  $46.0~\mathrm{m/s}$ . If the pitcher was in contact with the ball over a distance of  $1.50~\mathrm{m}$  and produced constant acceleration, (a) what acceleration did he give the ball, and (b) how much time did it take him to pitch it?

### Part A

ANSWER:

$$a_{\rm x}$$
 = 705 m/s<sup>2</sup>

Correct

### Part B

ANSWER:

$$t = 6.52 \times 10^{-2} \text{ s}$$

Correct

HW due 1/24 1/19/16, 11:52 AM

## Exercise 2.51

A rocket starts from rest and moves upward from the surface of the earth. For the first 10 s of its motion, the vertical acceleration of the rocket is given by  $a_y = (2.70 \mathrm{m/s^3})t$ , where the +y-direction is upward.

### Part A

What is the height of the rocket above the surface of the earth at t = 10 s?

Express your answer with the appropriate units.

ANSWER:

**Correct** 

### Part B

What is the speed of the rocket when it is 350  ${
m m}$  above the surface of the earth?

Express your answer with the appropriate units.

ANSWER:

$$v_y$$
 = 114  $\frac{\text{m}}{\text{s}}$ 

**Correct** 

## **Score Summary:**

Your score on this assignment is 100%.

You received 15 out of a possible total of 15 points.
